YANAY BERDAH

DATA ENGINEER | PYTHON • SQL • ETL • AWS

Israel | 054-5404192 | yanayberdah@gmail.com | github.com/yanaybe

PROFESSIONAL SUMMARY

Data Engineer with 3.5 years of hands-on experience building Python-based data systems and SQL/ETL pipelines in an elite IDF technology and intelligence unit. Experienced in transforming complex data workflows into reliable operational tools, optimizing queries over large datasets, and owning solutions from design through deployment and production debugging. Recipient of the 2025 Aman Award for Excellence for independently developing an AI-based data cross-referencing system with direct operational impact.

EXPERIENCE

Data Engineer | Unit 8200, Israeli Intelligence Corps

2023 – Present

- Designed and built an AI-based data cross-referencing system supporting operational teams; received the 2025 Aman Award for Excellence for its direct impact.
- Engineered Python and SQL ETL pipelines that reduced a recurring workflow from 2 hours to 5 minutes (96%) and eliminated manual analyst effort.
- Delivered production Python data tools adopted as core tooling by four teams across the unit.
- Optimized complex SQL queries over large datasets and owned data solutions end to end, from requirements and design through deployment, debugging, and performance tuning.
- Led four data analysts for 6+ months, prioritizing work, reviewing deliverables, and mentoring the team under operational deadlines.

SELECTED PROJECTS

Roomatch | Full-Stack Roommate-Matching Platform

- Built and launched a two-sided marketplace using React, TypeScript, and Supabase, including profiles, search, messaging, and a compatibility-matching algorithm.
- Owned the product lifecycle from research and UX through development and deployment.

Shnayim | Wedding-Planning SaaS

- Developing a Hebrew-language SaaS platform with Next.js, TypeScript, Supabase, and Tailwind CSS for tasks, budgets, and vendor management.
- Designed the PostgreSQL schema, a 65-task planning library, and a freemium monetization model.

TECHNICAL SKILLS

Languages: Python (advanced), SQL (advanced), TypeScript/JavaScript, Node.js

Data Engineering: ETL/data pipelines, data modeling, data validation and cleaning, pandas, NumPy, workflow automation, PostgreSQL

Backend & APIs: FastAPI, REST APIs, Supabase

Cloud & Tools: AWS Lambda, Amazon S3, Docker, Git/GitHub, PyCharm, VS Code, AI-assisted development

Practices: Production debugging, performance optimization, unit testing, end-to-end ownership, agile development

Languages: Hebrew (native), English (fluent)

EDUCATION & RECOGNITION

Unit 8200 Data Analysis Course — Unit 8200, IDF

Head of the Military Intelligence Directorate (Aman) Award for Excellence, 2025 — awarded for an independently built AI system whose intelligence output directly supports ground forces.
