YANAY BERDAH

DATA ANALYST | DATA RESEARCH | SQL & PYTHON

Israel · 054-5404192 · yanayberdah@gmail.com · github.com/yanaybe

PROFESSIONAL SUMMARY

Data Analyst with 3.5 years of experience in Unit 8200 investigating complex questions across large-scale, multi-source datasets. Advanced SQL and Python skills spanning data validation, modeling, ETL, automation, and evidence-based analysis. Played a key role in a team recognized with the Head of the Military Intelligence Directorate (Aman) Award for Excellence for an AI-based data cross-referencing system. Strong analytical thinking, pattern recognition, and a track record of translating ambiguous questions into actionable findings.

EXPERIENCE

Data Analyst / Data Developer | Unit 8200, Israeli Intelligence Corps 03/2023 – 10/2026

- Investigated large-scale, multi-source datasets to identify patterns, anomalies, and relationships, answering complex operational questions and delivering actionable findings to decision-makers.
- Wrote and optimized complex SQL queries to combine, validate, and analyze data across sources, improving the reliability and efficiency of recurring analytical workflows.
- Built Python and SQL automation that reduced a core data-processing workflow from 2 hours to 5 minutes (96% reduction).
- Designed and built an AI-based data cross-referencing system that contributed to the team receiving the Aman Award for Excellence for its operational impact.
- Performed data cleaning, validation, and modeling to improve consistency and confidence in analytical results.
- Led a team of 4 analysts for 6+ months, reviewing outputs, mentoring teammates, and prioritizing work under tight deadlines.
- Translated stakeholder questions into structured data requirements, analysis, and recommendations; solutions were adopted by 4 teams across the unit.

SELECTED ACHIEVEMENT

Head of the Military Intelligence Directorate (Aman) Award for Excellence, 2025
Team award recognizing the operational impact of an AI-based data cross-referencing system; played a major role in designing and building the system.

SELECTED PROJECTS

Roomatch | Roommate-Matching & Apartment-Search Platform
Designed a data-driven compatibility algorithm and modeled user and matching data in PostgreSQL (Supabase). Built and launched the product end-to-end, combining market research, structured data modeling, and metrics-based planning.

Detour | Location-Based Place Saving & Discovery App
Built an Android application that extracts places from shared content and helps users rediscover them when nearby. Worked with a Kotlin Android client and Supabase backend, integrating AI-based content extraction and Google Places and Directions APIs; developed flows to turn unstructured content into structured place records.

TECHNICAL SKILLS

Querying & Analysis	Advanced SQL, Python, pandas, NumPy, exploratory analysis, pattern identification, data validation, data cleaning
Data Workflows	ETL, data processing, cross-source analysis, workflow automation, PostgreSQL / Supabase
Reporting	Power BI, Tableau, dashboards, KPI reporting, data storytelling
Development & Tools	Git / GitHub, Docker, JavaScript / TypeScript, Node.js, React, REST APIs, AI-assisted analysis and development

EDUCATION & LANGUAGES

8200 Data Analysis Course | Unit 8200, IDF **Hebrew:** Native **English:** Fluent
